I am trained in assessing for WIC 5150 criteria. I also provide records and reports based upon my clinical treatment. I am not a forensic psychiatrist, and I have not received training regarding how to assess a patient's overall risk to the community or whether they are appropriate for Mental Health Diversion. I have not assessed either this patient's overall risk in the community nor this patient's appropriateness for Mental Health Diversion. If the Court would like an opinion on these matters, I will not be able to provide one and recommend the patient request a forensic psychiatric assessment on this matter.
